Art Unit: 3652

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-65, drawn to an apparatus, classified in class 102, subclass 302.
  - II. Claims 66-130, drawn to a method, classified in class 134, subclass 221.

The inventions are distinct, each from the other because:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus could be used to practice another and materially different process such as a process of exploding or blowing up a car or a suitcase or a shipping cask containing radioactive waste or, it would be used in a process to clean an underground pipe such as a sewer pipe.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
